Jerry -

This is typically the biggest challenge we face -- communication, but I think your summary is just about correct.

When you are going to be offline for an extended time like this, you may give your proxy to someone else on the Board or not as you wish.

As to going to Yuma, I can't identify with that! I love the snow and look forward to it. Snowblowers are for city folks! I use a Kubota L3710 4WD diesel tractor with a heated cab! Come on, snow!! I didn't get to use my snowshoes all last winter, so I'm hoping for better luck this winter.

Pete

Very sorry to hear of your affliction!! :-)
You have my proxy for the duration of my offline time. Jerry
