Title: Purchase of Treasurer Laptop PC

Text of Motion:

The Association purchase a refurbished laptop PC with Windows XP Pro, Norton Anti-Virus protection, and wireless Internet connectivity to run the QuickBooks application and be dedicated to the use of the Association Treasurer.

Rationale or explanation:

Many of our members use Macintosh computers and after testing, it was found that the PC and Mac versions of QuickBooks are simply not compatible in the context of the schema we use for our financial records. This also gives us a way to have the complete books present at a reunion.
